

Risk Assessment

Name of Service user	
Date of Risk Assessment	
Name of Support Worker completing the Risk Assessment	

Service User Information

Stonewall Housing undertakes Risk Assessments and Risk Management and Review Plans to help us to keep you and other people safe and secure.

A Support Worker will involve you in making your Plan and there is space in your Plan where you may record any comments about this process.

There are two parts to your Risk Management and Management Plan:

- There is a **Risk Assessment** that will be completed before you come to the project or just after you have arrived and will help us to understand what the risks are for you.
- There is a **Risk Management and Review Plan** that will be completed within a week of you coming to the project. This plan will take the information from the Risk Assessment and help us to plan the support that is required to help keep you safe and secure. The Review Plan will help us to monitor how things are going and whether the risks that have been identified are still the same or have become better or worse.

Your plan is confidential and you can see it whenever you like. We may need to share information in it with other agencies but we will always do this with your permission and in a confidential manner that protects your rights and privacy.

Please remember, you may request a Risk Assessment and Risk Management and Review Plan at any time if you are concerned that your circumstances have changed.
